

Walls or ceiling panels' Mounting Instructions

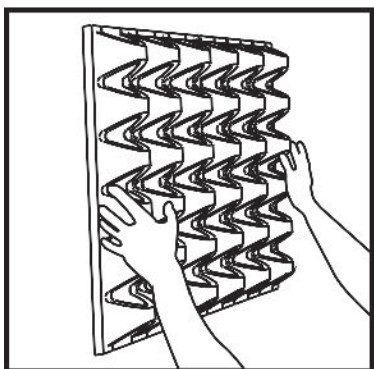

Accessories' Kit: the product is supplied with the necessary accessories.

Mark the measurements of the place where you want to install the panel by using a tape-measure. Remove the adhesive tape protection.

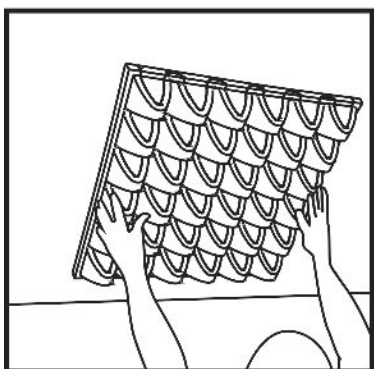

Apply mounting glue on the back of the panel...in all corners and at the center.

...with a proper tool.

Place the panel on the wall and press it homogeneously.

On the ceiling: place the panel and press it homogeneously...

...and that's it!!
