COSTC	58.5 cm	58.5 cm	8 cm	0.8

COSMOS®

Absorbent Panel

COSMOS® is the acoustic solution for commercial areas, offices and public spaces. This panel can be set on T-Ceilings or glued on walls or ceilings.

Famous designers prefer to use this kind of acoustic solutions since they are much more efficient, have good finishing and are less expensive than many others.

The 8 cm thickness and the inside labyrinth give it a high absorption coefficient. Its NRC average is 0.94 / m² [$>250\text{Hz}; <1\text{KHz}$].

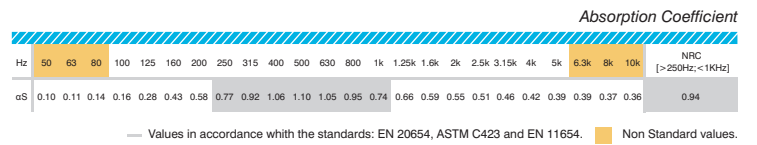

The ATP® COSMOS® absorbent panel covers the full voice sound spectrum, absorbs slap and flutter echoes in the room, thus providing a more pleasant and accurate listening environment.

This model proposes five synthetic wood finishes, a flexible design and placement options which offer unlimited aesthetic looks.
